## Description

---

Located on the northern side of the island, just a 20-minute drive from Portoferraio, the Elba Diving Center is based in Marciana Marina, one of the most beautiful locations on Elba Island. The diving center is situated on the access road to the port, only 100 meters from the seafront and 200 meters from the embarkation pier for dives.

The diving center, served by a large parking area that allows direct car access, is spread over a private area of more than 700 square meters. It features a fully renovated main structure covering 300 square meters, offering a spacious relaxation and reception area, a classroom, a storage room, rental equipment, restrooms with hot showers, changing rooms, and a large equipment storage area where guests staying multiple days can leave their gear ready for the next dive.

Outside, there are rinse tanks, a covered area for hanging equipment to dry, a garden for relaxation, and a dedicated barbecue area.

A wide selection of rental equipment is available, along with a certified filling station for nitrox and trimix mixtures. Even the most demanding divers using rebreathers will find everything they need for their dives. Elba Diving Center's exceptional logistics allow for flexible accommodation and management of both individual divers and large diving groups.

As an SSI Instructor Training Center, Elba Diving offers the opportunity to begin and progress in your diving journey up to the instructor level. Our staff is always up to date to ensure high-quality diving experiences. Safety and fun are our priorities.

Our dive sites cater to divers of all levels—discover them by visiting the diving section.
