Description

Paragon Dive Group is a dive shop founded by passionate technical divers for passionate technical divers. Our team wanted to avoid having to search multiple sites for the best equipment on the market. Instead, we wanted a place where our customers could quickly access high-quality gear for the best dive experience possible.

We have gone out of our way to source and offer only the best equipment with a focus on technical divers. Paragon Dive Group stands out from other dive shops because we are a family owned and operated company excited about adventure and technical diving. Our tight-knit crew gives our customers a more personal shopping and diving experience. Our team also believes traditional dive shops don't always meet the needs of advanced and technical divers. At Paragon Dive, our family caters to divers of all experience levels with a focus on technical divers.

At BJL Diving we believe that we offer the highest possible level of dive training. Our courses are not the cheapest, but we are confident we offer some of the best dive training available!

At BJL Diving our focus is on making sure the student diver develops the skills to dive at the level they are seeking so they can safely complete even the most difficult dives. We simply want to provide the best SCUBA training possible.

BJL Diving is owned and operated by Ben Lair. Ben is a full-time dive professional that focuses on technical diving courses for both diver level and technical diving instructor courses. Ben teaches open circuit, closed circuit, and overhead environment courses for divers of all levels including technical instructor level courses. What makes us unique is that we have three home bases (Arizona, North Florida, and Playa del Carmen, Mexico) that we primarily offer training out of but we are equipped to teach all over the world. In fact, we have experience teaching in some of the most remote locations on the planet.
