Description

Third Dimension Diving is Tulum's premier Cave and Technical diving facility.

We are a GUE Premium Dive Center, offering all levels of Cave, Technical and CCR training, along with support for Instructor Development, guiding and mentoring.

Fully rigged GUE JJ-CCR's are available for demo or rental.

We are an IANTD Instructor Development Facility, offering diver and instructor training at all levels of Cave, Technical, and CCR.

We are the home of Fathom Dive Systems in Mexico and have several Fathom Mk3 and Gemini's for both demo and rental during training.

We have a large number of steel LP85's in both BM and SM available for those more accustomed to proper cylinders and gas volumes, when pumped to the appropriate pressures ;-)

We bank all standard gases, boost o2, have a large supply of "ready to go" bailout/drive bottles, and stock large volumes of Sofnolime 797 and Intersorb 812.

3D is powered by SUEX, we dive in the fast lane, we have more than a dozen DPV's for rent, so that you can too.

Diving and training provided in Tulum, the Riviera Maya, deep caves of the Yucatan, and Cozumel's deep walls and colorful reefs.

Talk to us about project diving, and how we can help you add meaning to your adventures.
