Description

VIP Tec Diving – Precision Under Pressure

VIP Tec Diving is Bonaire's premier destination for precision-driven technical diving, offering a full range of PADI tec diving courses and expert-level support. Built on the award-winning foundation of VIP Diving, VIP Tec brings specialized training, state-of-the-art equipment, and custom gas blending to the island's vibrant tec diving community.

Whether you're exploring your first steps with Discover Tec, advancing into Tec, Tec Trimix, or Sidemount, or venturing deeper with CCR and DPV diving, VIP Tec delivers a personalized and professional experience in a safe and supportive environment. All training is conducted by highly qualified PADI tec instructors, and our tailored programs are designed to meet your individual goals.

Website: vipdiving.com

CCR FRIENDLY

VIP Tec Diving is proud to be 100% CCR friendly, exclusively supporting the Hollis Prism 2 unit. Our experienced staff are certified on the unit and ready to support your rebreather journey with high-quality CO₂ absorbent, rebreather-compatible cylinders, and full CCR gas fills, including oxygen and trimix, from our custom-built blending station.

OPEN CIRCUIT

We offer full support for divers training or diving with doubles or sidemount. Our rental fleet includes high-quality wings, backplates, sidemount rigs, regulators, spools, DSMBs, and all the essentials for a safe and streamlined dive.

DIVING WITH A DPV

Take your exploration further and faster with Diver Propulsion Vehicles. Whether you're diving from shore or boat, our DPVs add range, efficiency, and fun to your tec dives—perfect for covering large sites or penetrating wrecks.

BLENDING STATION

Our state-of-the-art gas blending station delivers precise custom mixes of oxygen and trimix, tailored to your dive profile. All blends are prepared by PADI-certified gas blenders, ensuring the highest safety and accuracy standards.

EQUIPMENT RENTAL

VIP Tec offers a full range of technical equipment for rent, including doubles, sidemount cylinders, regulators, backplates, harnesses, DPVs, and Hollis Prism 2 units (for certified CCR divers). Everything is meticulously maintained and ready for action.
